

No activities scheduled

I created a TEST Activity series with 2 tasks

With the item UNCHECKED under preferences, I tried to scheduled multiple people this TEST activity series;

But... when I did this, it scheduled the tasks for Robert Zalewski under both records

Robert Zalewski record

Type	Date	Time	Priority	Scheduled With	Regarding
<input type="checkbox"/>	10/24/2017	None	Low	+Robert Zalewski	
<input type="checkbox"/>	10/31/2017	None	Low	+Robert Zalewski	

William Zan record

Type	Date	Time	Priority	Scheduled With	Regarding
<input type="checkbox"/>	10/24/2017	None	Low	+Robert Zalewski	
<input type="checkbox"/>	10/31/2017	None	Low	+Robert Zalewski	

Next I tried to schedule it with the Option CHECKED, then after it was scheduled (unchecked it).

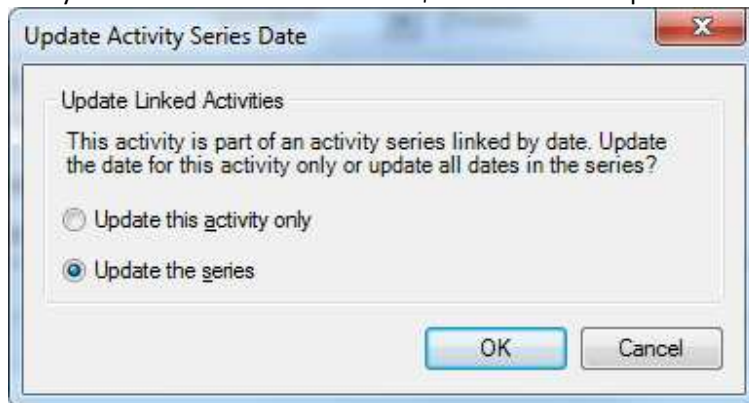

That scheduled the Activities Series for each person.

- I now went back and UNCHECK the (create separate activities)

I tried to reschedule the 10/24 activities, which it did but did not change the 10/31 Swing and a Miss

I did try scheduling it one-by-one, with the create separate activities Unchecked.

And you are correct... it did ask the \$32million dollar question

OKAY... now, how to proceed with scheduling multiple contacts an activities but allowing any one activities for any contact to be rescheduled (and moving forward the activity series)??
